INTRODUCTION

The most comprehensive bibliography of stromatolite studies to date was compiled by S.M. Awramik, H.J. Hofmann, and M.E. Raaben, and published in the book *Stromatolites* (M.R. Walter, Editor) in 1976. The second instalment offered here supplements that earlier compilation, bringing it up to date, and adding many older references missed earlier. The 1976 numbering system is continued here.* We welcome information on important references we may have missed, so that these can be included in the third instalment of the bibliography now in preparation.

Our compilation includes references contributed by the CAN/SDI computerized bibliography (National Research Council of Canada); Hofmann acknowledges financial support from the National Research Council of Canada (Grant no. A7484) for defraying costs of this service.

A selective subject index is given on pp. 161—166.

*Note: The 1976 bibliography listed titles up to No. 2034. During editing 15 titles were removed (Nos. 64, 78, 315, 405, 604, 987, 1210, 1365, 1390, 1706, 1747, 1825, 1840, 1863, 1924), and No. 343, which does not exist, was inadvertently left in; therefore, that bibliography contains only 2018 references, of which 1456 deal with stromatolites (Awramik, 1976, p. 697). The present bibliography contains 1235 references; Nos. 2822 and 2903—2905 have been deleted during editing; No. 2684 is listed out of alphabetical order.
